SIC CODE (Standard Industrial Classification Code)
The objective in industry classification is to have each place of business coded on the basis of its principle activity. If a firm conducts different activities at its various establishments, separate industry codes are assigned to the extent possible to each activity. Industry codes are assigned to each reportable establishment based on 'nature-of-business' information employers submit, in accordance with the Standard Industrial Classification Manual, 1972 edition.

ESTABLISHMENT

An establishment is defined as a single physical location at which one, or predominantly one, type of economic activity is carried on. Employers who operate at two or more locations are requested to identify separately the employment and payrolls of each location.

EMPLOYMENT

Annual average employment is the average number of monthly workers covered under the Montana unemployment insurance laws who earned wages from a reporting unit during the pay period which includes the 12th day of the month.

ANNUAL WAGES PAID

Total wages, as reported on the quarterly contribution report of employers covered by the unemployment insurance law, are the total amount of compensation paid by the employer during the year.

TAXABLE WAGES

Taxable wages are that part of employers' annual wages subject to the unemployment insurance tax. Taxable wages are reported quarterly, and normally are highest in the first and second quarter, since UI taxes apply to first dollars earned during the year.

CONTRIBUTIONS

Contributions are the taxes due on taxable wages for the year. Taxes are assessed on subject employers at rates determined by Montana's experience-rating law.

DISCLOSURE RESTRICTIONS

Publication of employment and wage data is withheld for any industry level which consists of fewer than three reporting units or in which a single establishment accounts for 80 percent or more of the industry's employment.

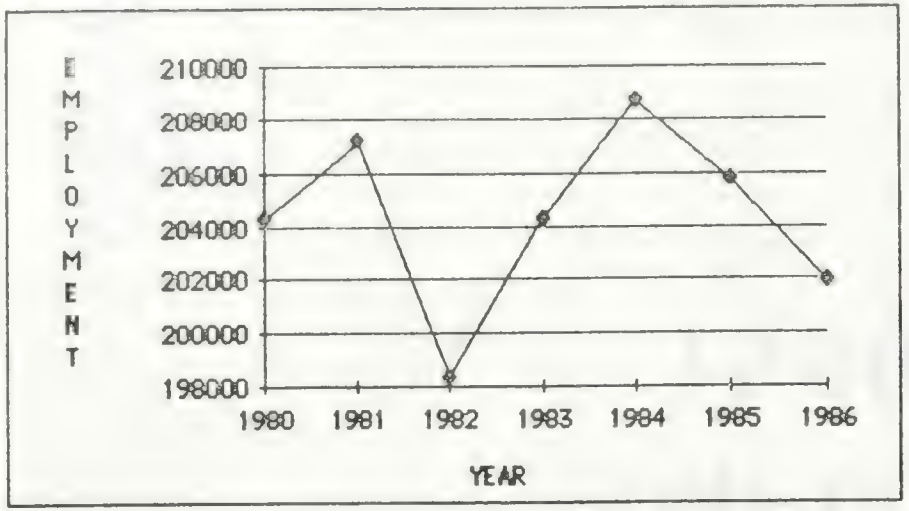
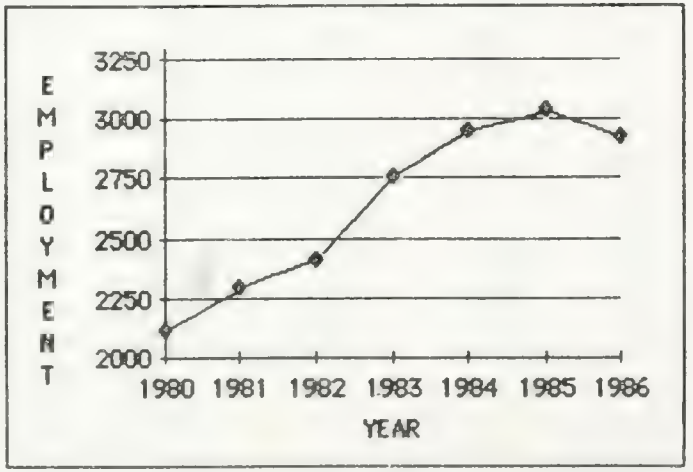
ANNUAL AVERAGE EMPLOYMENT 1980-1986

ALL INDUSTRIES
EXCLUDING GOVERNMENT



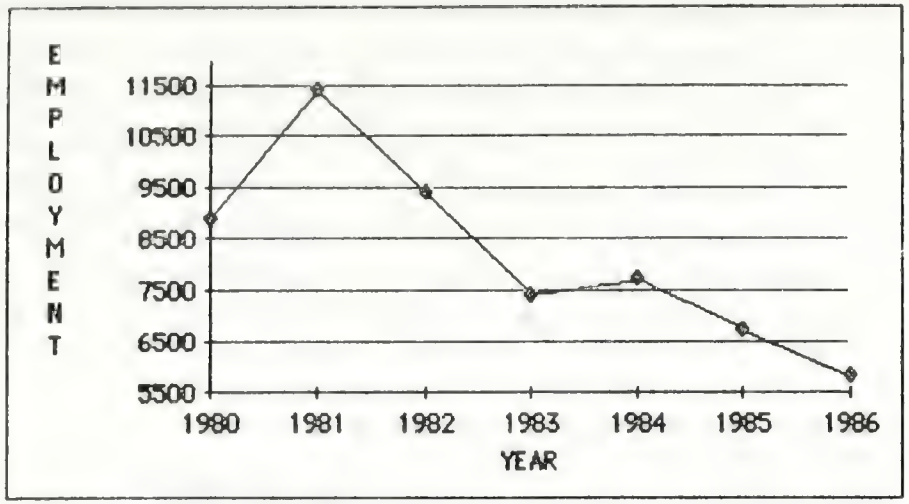
Transportation, Communications, Public Utilities and Mining contributed to the 1981 employment increase. In 1982, Mining and Manufacturing caused a significant drop in the overall employment. 1983 found Manufacturing and Finance, Insurance, Real Estate on the upswing and 1984 employment improved in every major industry except Construction. In 1985 and 1986, employment in Mining, Construction, and Wholesale Trade took noticable drops, while there was an increase in Service related employment.

AG/AG SERVICES



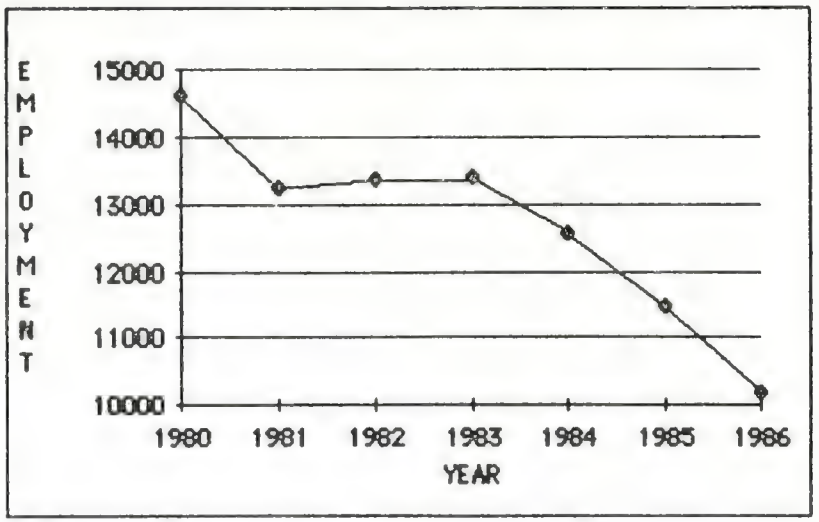
All industries within Agriculture/ Agriculture Services showed a steady increase from 1980 to 1985. The largest area of increase was in cash crop production. The agriculture categories as a whole experienced a 4% decline in 1986 with the largest drop appearing in livestock production.

MINING



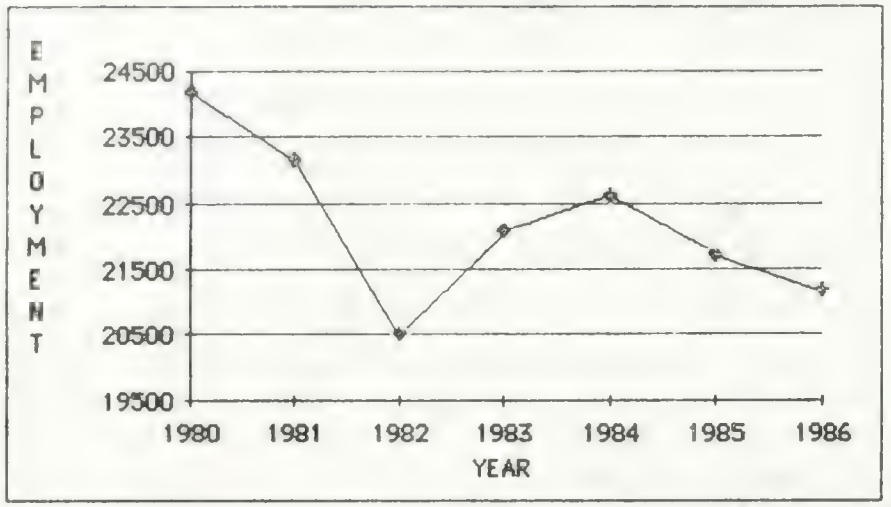
This illustrates the boom/bust situation in oil and gas exploration and extraction from 1980 through 1983. Also contributing to the radical decline in employment was the virtual closure of a large copper mine in Silver Bow County. 1986 saw an increase in metal mining in Montana, particularly in copper and gold mining. However, the decline in the oil and gas industry caused the overall decline in the mining industry curve in 1986.

CONSTRUCTION



The decline in the first half of the 1980s is due almost entirely to the cutback of a large industrial contractor in eastern Montana. 1986 shows a decline of 11% in construction over 1985 with the bulk of the losses in general building construction.

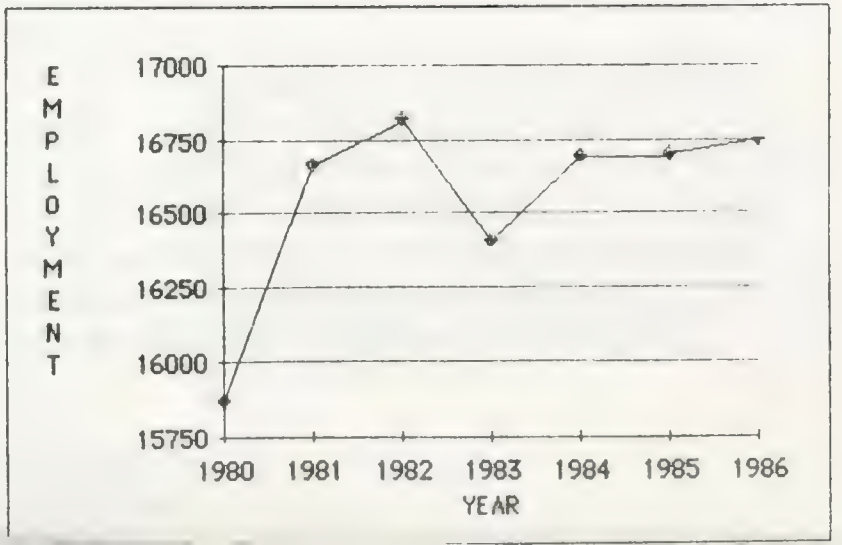
MANUFACTURING



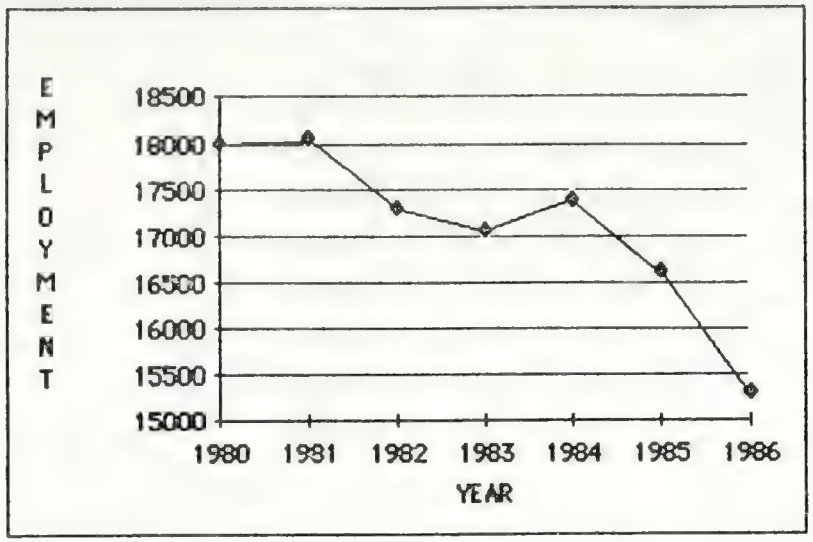
The employment decline in 1982 was due mostly to closures and cutbacks in logging camps and sawmills. The closure of a major copper smelting and refining plant also contributed to this decline. Logging camps and sawmills made a slight recovery in 1983. In 1986 Manufacturing as a whole showed a 3% decline from 1985, the largest portion of this being in the lumber and woods industry.

TRANSPORTATION, COMMUNICATIONS AND PUBLIC UTILITIES

The sharp increase from 1980 to 1981 can be attributed to the deregulation of the trucking industry firms being covered by Unemployment Insurance (see Definitions Section). The drop in 1983 was due to the strike of a major Montana communications company. 1984 employment was lower than previous years because of the divestiture of a national communications company. The level of employment for this industry has remained stable for the last three years.

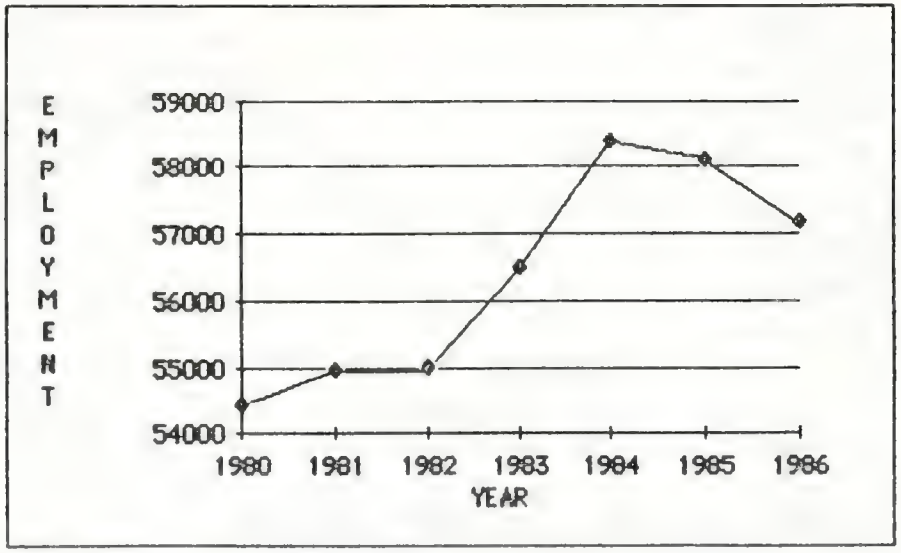


WHOLESALE TRADE



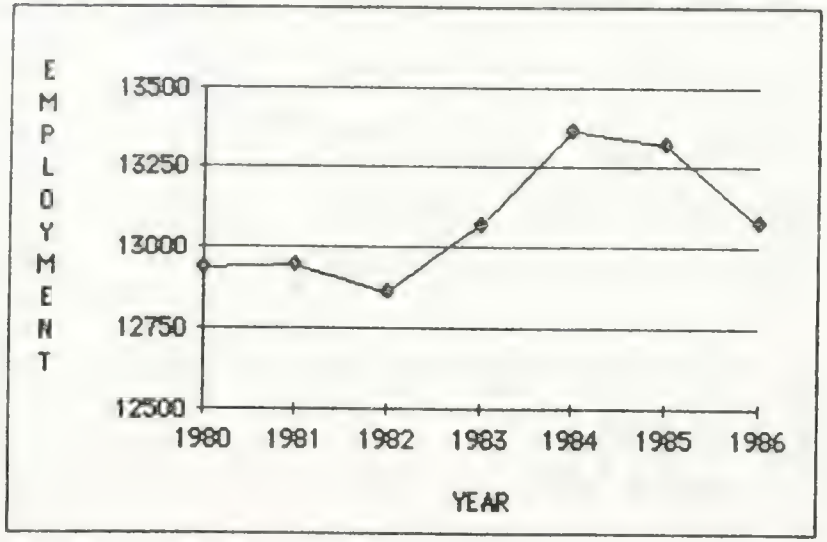
The largest components of Wholesale Trade to lose employment during 1982 and 1983 were lumber and farm machinery sales. Lumber sales improved slightly in 1984 but dropped again in 1985. The drop in employment from 1985 to 1986 is due in part to changes in industrial classification that take place the first quarter of each year. Many of the businesses were reclassified into Retail Trade and Services.

RETAIL TRADE



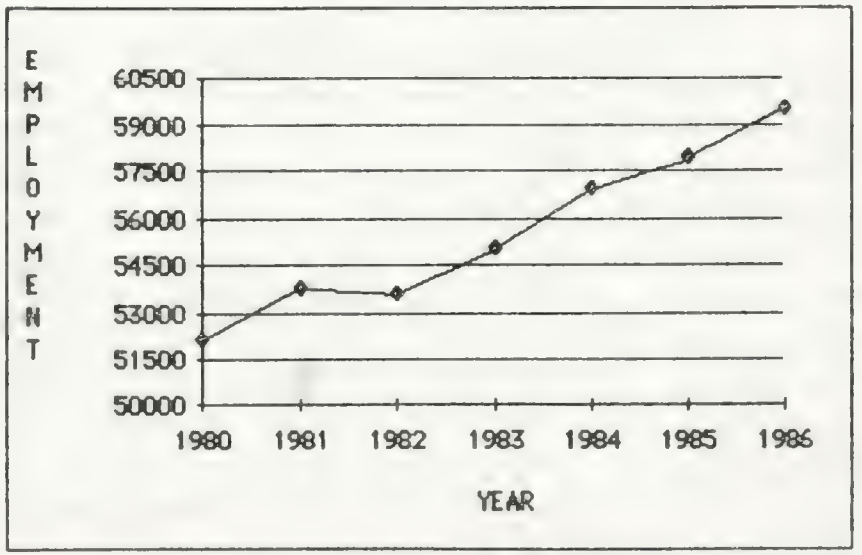
The increase in 1983 and 1984 employment was centered in eating and drinking establishments, with an approximate gain of 400 people in 1983 and 800 in 1984. Employment in retail trade has remained fairly stable for the last two years.

FINANCE, INSURANCE, REAL ESTATE



From 1982 to 1984 there was a notable increase in insurance agents and real estate agents in Montana. Since that time, employment in this industry seems to have leveled off with only a slight drop in employment in 1986. This decline can be attributed mainly to the banking industry.

SERVICES



This industry as a whole has had a fairly stable increase in employment over the past few years. A slight incline was noted in the amusements and recreation industry (mainly video rental stores) and in health services. The increase in 1986 can be attributed to the growth in the business service industry and to Montana's expanding tourist industry.
